

```
#include<stdio.h>

int main()
{
    FILE *fp = NULL;
    char szText[50];

    fp = fopen("file_to_screen.txt", "r");

    if(NULL == fp)
    {
        printf("\nCant Open File\n");
        return -1;
    }

    while(fgets(szText, 49, fp) != NULL)
        printf("%s", szText);

    fclose(fp);
    fp = NULL;

    return 0;
}
```
