```c
#include<stdio.h>

int main()
{
    FILE *fp = NULL;
    char szText[50];

    fp = fopen("keyboard_to_file.txt","w");

    if(NULL == fp)
    {
        printf("\nCant Open File\n");
        return -1;
    }

    printf("\nEnter strings:\n");
    while(strlen(gets(szText)) > 0)
    {
        fputs(szText,fp);
        fputs("\n",fp);
    }

    fclose(fp);
    fp = NULL;

    return 0;
}
```
